Note. Data include persons with a diagnosis of HIV infection regardless of stage of disease at diagnosis.

^a Includes data from areas with confidential name-based HIV infection reporting since at least January 2005. Estimated numbers resulted from statistical adjustment that accounted for reporting delays, but not for incomplete reporting. Rates are per 100,000 population.

^b Includes data from areas with confidential name-based HIV infection reporting as of December 2008.

^c Pennsylvania implemented confidential name-based HIV infection reporting in October 2002 in all areas except Philadelphia, where confidential name-based HIV infection reporting was not implemented until October 2005.

^d Because column totals for estimated numbers were calculated independently of the values for the subpopulations, the values in each column may not sum to the column total.
